A BUN

The bun or knot starts with a ponytail and is twisted around itself and can sit anywhere. The Hailey Bieber bun, currently very popular, is parted in the middle with a tight, smooth look. Whether you prefer a softer more relaxed bun or sleek look, the result is always a classic beautiful.

PERFECT PONYTAIL

Channel the 60's by simply having your hairdresser tease your hair into a high or low ponytail, making it look effortless. This will be the perfect addition to any gown.

THE CHIGNON

Typically a low bun on the side of the head that adds softness and will accompany any dress perfectly. This style is best with headbands or tiaras, and veils or birdcages. Consider this if you are having a vintage style wedding.

FOR SHORT HAIR

Consider doing a short bob with finger waves, a voluminous updo or textured waves. A swept back pixie or pinned back bangs add a polished look. Tousled hair while it may be very worked, seems more natural and a great option for your wedding hair style.
